Audiovisual Performance

Victor and Erik Monasterio (consultant psychiatrist) present an audiovisual multimedia performance that combines live music (original compositions) interpreted with traditional Andean instruments and original photography of mountaineering and exploratory adventures, in various mountain regions of the world. The photography focuses mainly on Bolivia, but also other parts of Latin America, Tibet, India, Alaska, USA, Australia and NZ. The presentation reflects our Bolivian culture, and experiences as explorers and mountaineers focusing on “first ascent routes” on rock and ice peaks in some of the highest mountains in the Americas and the world.
